The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5, 8-11, 14-17, 19 and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Meeusen (U.S. Patent 3,857,478).

Meeusen shows at least two lateral traction elements 1 and support elements 3 fixed in an articulated manner to the traction elements 1.

Re claim 2, the support elements are closely spaced next to one another and they cover the traction element 1.

Re claim 3, each traction element 1 has its own support elements.

Re claim 4, the support elements are identical and they define a flat upper side.

Re claim 5, the support elements only have a carry function and the traction elements only provide traction.

Re claim 8, the support elements provide good impact resistance.

Re claim 9, as the support elements go around end sprockets there is a slight upward arch.

Re claim 10, there is a depression between projections 5.

Re claim 11, Figures 2 and 5 show a U-shape for the support elements.

Re claim 14, see Figure 2.

Re claim 15, a longitudinal transporter is formed.

Re claim 16, see Figure 7.

Re claim 17, the elements are detachable and may be replaced.

Re claim 19, shown are two chains 1.

Re claim 20, Figure 5 shows first and second guide rails 10.

Claims 6, 7, 12, 13 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
